 Suppl.

More decided improvement is noticeable in the productions of the past year from the *Wilmington Co.*, than those of any other manufacturers. By the application of scientific principles in their laboratory they have succeeded in accomplishing such results as are both surprising and pleasing to those having occasion to use Porcelain Teeth.

Ask your nearest dealer to show you a set of the **NEW WILMINGTON TEETH**, or send \$1.00 for a sample set to

The Wilmington Dental M'f'g. Co., Wilmington, Del.

==* Our Specialties

We desire to call the attention of the Dental Profession to our unrivalled filling preparations:

- ALPHA SOFT GOLD FOIL, Nos. 3 to 6.
- ALPHA COHESIVE GOLD FOIL, Nos. 3 to 60.
- ALPHA UNANNEALED GOLD FOIL, Nos. 3 to 6.
- ALPHA EX. COHESIVE ROLLED GOLD, Nos. 30, 40 & 60.
- ALPHA GOLD PELLETS, Nos. $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, 1, $1\frac{1}{2}$, 2, 3 & 4.
- ALPHA EXTRA PLASTIC PELLETS, Nos. 1, 2 & 3.
- ALPHA ALLOY—A Very Superior Article.
- ALPHA GUTTA PERCHA STOPPING, No. 1, Hard.
- ALPHA GUTTA PERCHA STOPPING, No. 2, Medium.
- ALPHA CEMENT—Shades light Yellow and Gray.

Our SOFT FOIL will be found to answer a universal purpose, from wedge filling to contour work. Give it a trial.

Our EXTRA PLASTIC PELLETS will work much softer than any we have heretofore manufactured, and are therefore peculiarly useful for filling fragile teeth by the Herbst method.

Our gold is specially refined by ourselves and we guarantee it to be as PURE AS ANY MADE.

Our GUTTA PERCHA PELLETS in air-tight tubes will not deteriorate by age, and are equal to any in the market.

Our ALPHA ALLOY possesses great edge strength, holds its color, will not shrink, and is easily manipulated. Try it and you will use no other.

If your dealer cannot furnish these goods, send direct to us.

DR. I. W. LYON'S TOOTH TABLETS

For Purity, Efficiency, Neatness and Convenience these Tablets have no equal as a Dentifrice. They are put up in Seamless Metallic Boxes, which are impervious to air and moisture, and may be carried on a journey without danger of breaking.

HIGHLY INDORSED BY EMINENT DENTISTS.

PRICE 50 CENTS A BOX. SOLD BY DRUGGISTS AND DEALERS GENERALLY.

DR. I. W. LYON'S PERFECT TOOTH POWDER

ENAMELLED METAL BOX
REDUCED IN SIZE.

This Powder is carefully prepared by an experienced dentist, familiarized by practice with the wants of the teeth. It is absolutely pure and free from acid, grit, or other hurtful substances, and is highly recommended by the most eminent men in the profession. It gives a *delightfully refreshing sensation* in the mouth, strengthening and healing the gums, and imparting a fragrance to the breath which is very agreeable.

Put up in an enameled metal box with sprinkler top, free from the mishaps incident to glass or wood, and very convenient for use, especially in traveling.

ENAMELLED PAPER CARTON
REDUCED IN SIZE.

PRICE 25 CENTS A BOX. SOLD BY DRUGGISTS AND DEALERS GENERALLY.

Approximate Formulas: Dibbe's White, \$5.00 ; Flagg's Facing,
\$5.00 ; High Grade Alloy, \$6.00.

NOTE.—Every Alloy above mentioned is made with great care, of pure metals, and none of them contain antimony, cadmium, lead, bismuth or other metals known to be of no value or a damage to dental alloys. I have used Alloys of all kinds for 20 years, and have experimented with and tested my own for 13 years. Each Alloy is made upon honor, and the price charged in every case is proportioned to the cost of material and expense of manufacture.

Any formula desired manufactured specially to order in quantities of ten ounces or more. Write for terms. Respectfully and Fraternally,

H. E. VAN HORNE.

Without Charge. For ONE DOLLAR and your correct ad-
dress, I will forward by return mail, a
Dollar Trial Package at regular rates, of any Alloy from above list, and
without charge a Package of Sheffield Tooth Crown Cement, (price \$1.00.)

H. E. VAN HORNE, 444 Sixth Ave., New York.

AKRON DENTAL • RUBBER.

The material of which this Rubber is composed, is prepared by a new process which insures

ABSOLUTE PURITY,

Resulting in a product of wonderful Density, Fineness and Strength. It is especially designed to meet the requirements of those who seek to produce the most perfect and artistic work. It is exceedingly tough and light and takes a beautiful polish. Plates may be made very thin without splitting or crumbling away about the edges. It can be used with the best results for making *partial lower dentures*, an advantage which no other rubber possesses. It has the unqualified approbation and endorsement of the Profession everywhere, and never fails to give satisfaction.

IT WILL COST YOU NOTHING TO TRY IT.

A NEW DISCOVERY.

Far Superior to Liquid Nitrous Oxide.

The Vegetable Anæsthetic.

It is without any of the objectionable features peculiar to other Anæsthetics; on the contrary it builds up the tissues, quickens the circulation and adds oxygen to the system.

The properties of the herbs from which it is manufactured are hypnotic, diaphoretic, stimulative and antispasmodic. The patient awakens from the sleep refreshed and cheerful, and reports the sensations and effects as most agreeable.

It is given to the youngest children, the most sensitive persons, as well as the aged and enfeebled, and no injury has resulted, nor, in the nature of the anæsthetic, can result from its inhalation by persons having a tendency to heart and lung diseases.

THE VEGETABLE ANÆSTHETIC has reached an unprecedented success since its introduction, and promises an entire revolution in modern dentistry and surgery.

For sale by the manufacturers (owners of Mayo's patent) in 100, 200 and 500 gallon cylinders.

* * *The fourth edition of our pamphlet, with testimonials from prominent physicians, surgeons and the press is now ready, and copies can be had by applying to

THE BOSTON VEGETABLE ANÆSTHETIC COMPANY.

15 HARVARD PLACE, BOSTON, MASS.

AGENTS SOLICITED.

DR. U. K. MAYO:

DEAR SIR:—Should have an unlimited use by the entire medical profession.

H. HUTCHENS, M. D., Boston.

I consider this Anæsthetic the safest the world has yet seen.

WM. H. THORNDYKE, M. D., 92 Boylston St., Boston.

I wish to express to you the satisfaction afforded me by your administration of Vegetable Anæsthetic in the case of the infant seven months old upon which I operated at your office yesterday, although it occupied over fifteen minutes you kept the child insensible to pain with the advantage of perfect safety and entire absence of disagreeable after-effects.

L. A. PHILLIPS, M. D., Boston.

DR. U. K. MAYO:

DEAR SIR:—It is the best and safest Anæsthetic; valuable in some forms of disease. I have proved this in last four years, after a practice of forty years in my profession.

O. H. WELLINGTON, M. D.

We have used the Vegetable Anæsthetic over a year exclusively in our practice, both for the extraction of teeth and minor surgical operations. repeatedly in heart disease, severe lung diseases, Bright's disease, etc., etc., where patients were so feeble as to require assistance in walking, many of them under medical treatment, and the results have been all we could ask. No irritation, suffocation, nor depression. We heartily recommend it to all as the anæsthetic of the age.

The WALTHAM CORUNDUM WHEEL for Dry Grinding

MANUFACTURED BY

WALTHAM EMERY WHEEL CO.,

WALTHAM, MASS.

* * These Wheels were first brought to the attention of the Dental Profession, by Dr. HORATIO C. MERIAM, of Harvard University, and were used by him in his clinic at the International Medical Congress. At the annual meeting of the Massachusetts Dental Society, a committee was appointed to secure their being placed before the profession.

As they grind porcelain without the use of water, they can be used by Dentists, at the Chair, without spattering or soiling their office coats. They cut much faster, and being indestructible by heat or acids, are more durable than the ordinary Corundum Wheel, and will accomplish more than double the amount of work. They can be used with water if desired.

The points we made for Dr. Meriam for his experiments in reaming the holes in porcelain teeth, and they may be used for this purpose in the Ash Tube Teeth, Bonwill, Foster Crowns, &c. See article in Dental Cosmos of August, 1886.

STEURER'S PLASTIC GOLD.

We would like to call your attention to a new form of Dental Gold that we have introduced to the profession under the name of "STEURER'S PLASTIC GOLD," which has successfully withstood all the tests at the clinics as well as in private practice for the past two years.

It is chemically pure Gold in a plastic state, without admixture of any foreign substance, of a brown color and homogeneous appearance.

We claim the following advantages over all other forms of Gold heretofore used:

1st. It is more cohesive.

2nd. It has a *spreading quality* before it is completely condensed, so that it will adapt itself perfectly to the walls of any cavity.

3rd. A tooth can be filled in one-third of the time it takes with any other Gold, simple hand pressure being sufficient to make a solid filling, the mallet (which is so disagreeable to most patients) can be dispensed with, and so sensitive teeth, or those whose walls are frail, can be easily filled.

4th. No retaining points are needed—simple undercuts are sufficient—so that very often the natural cavity, after the decay has been removed, has sufficient undercut to retain this form of Gold.

5th. Being absolutely pure Gold, it retains its color.

Beware of worthless imitations. Be careful to see that it is in the shape of small square pieces, packed in bottles, and labeled *Steurer's Plastic Gold*, because the imitations, although they may apparently work tolerable in the commencement, do not make a solid filling, but gradually crumble away.

Price Per Bottle 1-16 oz., \$2.50.

Cash with all Orders.

Is the form most generally used.

GOLD CYLINDERS.

Two Patents Sept. 19, 1876. Patent Sept. 25, 1876. Patent April 17, 1877.

Style A, Flattened.

Style A.

Loose, and can be used as Pellets.

Style B.

Loose, but more compact than Style A.

Style C.

Compact, but not Hard, used as Cylinders only.

We also make Style C in tin and gold. In making them a sheet of No. 4 gold and tin are rolled together, the gold on the outside. The same numbers are made as the Style C gold cylinder.

These numbers are to denote that No. 1/2 is a half sheet of No. 4 Gold Foil cut into strips and rolled into cylinders. No. 1, one sheet; No. 1 1/2, one sheet and a half; No. 2, two sheets, &c.

HOOD & REYNOLDS' IMPROVED ROCKING ENGINE.

The standard, which is tubing nickel plated, is held in position by the spring, *A*. This spring is made from piano wire, and gives the standard the most delicate rocking motion of any engine in the market. The standard can be set back by loosening screws at *L*, and pulling spring through slots. To set forward push spring back. The wheel is kept off centre by spring, *M*. To tighten spring screw up at the base.

The standard setting back allows the operator to place the engine nearer the patient. The spring, *B*, acts as a balance to the arm, *C*, which is covered its entire length with tubing, and therefore is protected at every point from the pulley wheel to hand-piece.

To lower the arm, raise the arm out of wheel, *D*. This spring is flexible, and can be bent so as to have the arm stand in any position. To tighten belt loosen screw, *E*, and raise top of standard at *F*. The small set screw, *G*, secures the pulley to the arm. Should the inside wire of arm get worn to take up lost motion, loosen screw at *G*, and pull the wire through a trifle.

H is a handle that is for two purposes. One to carry the engine, and the other to turn the wheel in three different positions. To turn the wheel, press spring, *I*, with foot and turn to the right. The wheel is held in three positions by slots engaged with spring, *I*. The turning of the wheel allows the operator to get into different positions without changing the position of his foot.

The hand-piece, *J*, is connected by a covered flexible spring, *K*.

LAWRENCE'S

AMALGAM.

["THE OLD RELIABLE."]

This Amalgam has received the endorsement of the Profession at large for **OVER FORTY YEARS**, which would seem to render any remarks as to its excellence superfluous.

It is never sold in bulk, nor in any other form than in a white Lithographed Envelope, covering a brown one, containing the Amalgam with *Trade Mark* on the lap of each, and both copyrighted.

Beware of counterfeit envelopes and bogus amalgam, whether made from so-called analysis or otherwise. The safest way is to purchase **ONLY** from regular dealers or their agents.

PRICE, THREE DOLLARS PER OUNCE.

The S. S. White Dental Manufacturing Company, is Sole Agent, and communication relating to my Amalgam should be addressed accordingly. I am, and shall continue to be the **ONLY MANUFACTURER**.

AMBROSE LAWRENCE, M. D.,

476 COLUMBUS STREET,

BOSTON, MASS.

BEECHER'S DENTAL DIRECTORY.

The cut below represents our extra fine quality of Dental Tubing, which we are now prepared to furnish the Trade. We make it in all the usual lengths and cover it with Mohair or Silk, in any shade or pattern desirable. We have some new shades of Silk and Mohair woven in new designs which look very fine. Our Tubing throughout is made from the very best material obtainable and we guarantee each Tube, and any that is not satisfactory can be returned.

DENTAL FLOSS,

CHEMICALLY PURE. WAXED and PLAIN.

We very respectfully invite your attention to our superior quality of *Dental Floss*. We manufacture it from the same stock of Raw Silk that we do our fine Braided and Twisted Surgeon's Silk, namely: that from the *Tsatlee*, Region, China. The fibres of this Silk are longer and finer than can be produced by any other region or country, hence the Silk when finished is stronger, and of finer quality, than Silk that is made from the best material that other countries can produce.

To accommodate dealers who sell our Floss, we print their name and address on label of each spool.

PORCELAIN TEETH.

*Beginning at Vienna, in 1873, where I made my first display, I have received successively at the Six World's Fairs the **Highest Award for ARTIFICIAL TEETH**; this being the most important branch of my business and all that I exhibited.*

*The greatest proof ever extended for Superiority to any manufacturer of **PORCELAIN TEETH**, for their Strength, Adaptation and Natural Life-like Appearance, was received by me through the Report of the Judges; Centennial International Exhibition, 1876.*

EXTRACT

FROM THE GENERAL REPORT OF THE JUDGES ON AWARDS OF GROUP XXIV.

"H. D. Justi exhibited nothing but teeth, but his display was beautiful in the extreme. In color, translucency and texture, they were all that could be desired. They were a faithful reproduction of the physiological characteristics of the natural organs, both to the individual teeth and relatively to the entire set. Their conformation with reference to close and easy adaptation to the maxillary arch showed careful study of the needs of both patient and operator. Their various and numerous deviations from uniformity of arch and outline, simulating the irregularities of nature, was so perfect that when in the mouth no suspicion of their artificial nature would be entertained. The disposition of tooth-material was so skillfully managed as to secure the greatest amount of strength with the least bulk, and the insertion of platinum pins was so arranged as to render their displacement an almost impossible accident."
